

**Bank of China makes the difference in the lives of a QC community**

Employees of Bank of China Manila continue to serve society by making impactful activities to the lives of its fellow men. Last October 27, 2018, BOC Manila employees visited the Munting Pamayanan Gawad Kalinga Village at Barangay Escopa III, Project 4, Quezon City where they helped in the development of the community by digging foundations where future structures will be erected for the benefit of the community dwellers.

Led by country head Mr. Deng Jun, the BOC employees worked the whole morning and did 'bayanihan' or community work together to accomplish the goal of deepening the foundations needed for the building of structures. Despite the arduous task of tilling the soil using shovels and pick axes combined with the hot weather, the participants in this CSR activity gladly assisted one another and took turns in doing the job.

The community was very thankful and happy for the visit of the BOC employees in their village. Bank of China also ordered food for the residents that they can partake in as well as provided a monetary donation to the Munting Pamayanan community, which they can use for their community needs.

In this enriching activity, BOC has truly Made the Difference in the lives of many families.
