PH-China art exhibit opens in Shenzhen

Bank of China Manila, in partnership with the Metropolitan Museum of Manila (MET), the Chinese Culture and Art Association, and the China Daily Asia Pacific, organized a cultural exchange program and art exhibit as part of its efforts to bridge business between the Philippines and China. The program featured two art exhibits, one in Manila, the other in Shenzhen.

With the theme 'In Harmony with Nature', the exhibits seek to promote environmental stewardship and green living in both countries through the participation of 10 renowned artists. Five from the Philippines and five from China, to participate in the exchange.

At the heart of the cultural exchange program is the goal to unveil the subtle similarities shared by two neighboring—but culturally different—countries. As testament to this ambition, both exhibitions featured collaborative paintings involving all 10 artists during the gallery openings at the MET and the Art Wharf. The resulting works showcased an amalgamation of perspectives about man and the environment—showing how different visions come together to showcase harmony.
